

'Flocking game'

- When a predator stands in the centre of the circle, does the pray change the way of flying?

Yes, it does

No, it doesn't

- In which way does it change?

The pray flies faster / more slowly

The pray flies higher / lower.

The pray flies straight / sideways.

- What happens when two predators are introduced?

The pray flies faster / more slowly

The pray flies higher / lower.

The pray flies straight / sideways?

- What happens the first time several bags are thrown around?

The predator' chase of pray is a success / a fail.

The predator knows what to do / looks confused.
