

'Join the dots'

Teacher notes. Water birds have special features that help them move: streamlined shapes, waterproof feathers, webbed feet,... Their shape is an adaptation to a specific way of life in a particular habitat. Water birds have streamlined shapes to reduce resistance from water when they swim:

Vocabulary	Structures
Diver	I have + noun, so I am...
Dabbler	
Tail	I'm + noun because
To raise	
To slope down	
To feed	
rounded / elongated	
Bottom/surface
