

BRAIN TEASERS

Team Tales

Solution

This is one way to solve the Brain Teaser.

Team		Won	Lost
Bobcats		5	5
Cheetahs		2	8
Lions		7	3
Panthers		6	4
Tigers		5	5

Explanation

- Look at the graph. Only two teams won the same number of games. The clue says they are the Tigers and Bobcats. Each won 5 games. The clue says they played 10 games.
Subtract: $10 - 5 = 5$
- The other three teams are left. Of those, which one has won just one more game than another? One team won 7 games, and the other team won 6 games. They must be the Lions and the Panthers.
- One team is left. That team has won 2 games. It must be the Cheetahs.
